## SUMMARY

Web Developer with strong foundations in HTML, CSS, JavaScript, React, and REST APIs. Hands-on experience building responsive web applications and full-stack projects during MCA and internship. Seeking an entry-level Web Developer role to contribute to scalable, user-focused products.

## EDUCATION

### ATRIA INSTITUTE OF TECHNOLOGY

Master of Computer Application

CPI:81.66%

Bengaluru, Karnataka, India

Dec 2021 - Sep 2023

### VIKASH GROUP OF INSTITUTIONS

Bachelor of Computer Application

CPI:87.66%

BhawaniPatna, Odisha, India

Jun 2018 – Nov 2021

## PROFESSIONAL EXPERIENCE

### Fullstack Java Intern

Pie Infocomm Company | 10/2022 - 12/2022

- Created a visually stunning online art gallery platform with Java and the MEAN stack, boosting engagement metrics by 50% and doubling the average time users spend on the site during the first six months.
- Orchestrated initiatives that integrated user feedback into service enhancements, achieving a 35% boost in user engagement levels and positioning the company as a leader in customer-centric solutions within the industry.

## SKILLS

**Frontend:** HTML5, CSS3, JavaScript (ES6), React, Bootstrap

**Backend:** Python, Java, PHP, REST APIs

**Database:** MySQL, MongoDB

**Tools:** Git, GitHub, Docker, AWS (Basics)

## PROJECTS

### Clinical Support System

06/2023 - 09/2023

Built a comprehensive clinical assistance solution using Python, HTML, CSS, JavaScript, REST APIs, and database integration, enabling real-time data visualization, form handling, and decision-support workflows for healthcare users, with focus on modular UI components, API consumption, and secure data processing.

### House Price Prediction

09/2022 - 11/2022

Engineered a house price prediction system using Python, machine learning algorithms, and Flask, integrating a web interface with backend APIs to process user input, perform model inference, and display dynamic prediction results, following MVC structure and basic deployment practices.

### Crime Reporting System

05/2022 - 07/2022

Developed a full-stack crime reporting web application using PHP, MySQL, HTML, CSS, and JavaScript with authentication, CRUD operations, and optimized backend queries, improving data entry speed, report accuracy, and overall system usability for end users.

Technologies Used Across Projects: HTML5, CSS3, JavaScript, React, Python, Flask, PHP, MySQL, REST APIs, Git, Responsive Design, CRUD Operations, Authentication, API Integration.

## CERTIFICATIONS

- Data Science Professional, Oracle Cloud Infrastructure (10/ 2025)
- Responsive Web Design, freeCodeCamp (01/ 2024 - 12/ 2024)
- React Basics,Meta (10/2023)
- Full Stack Web Development , GeeksforGeeks (Nation Skill Up) (08/2024)
- Web Application Technologies & Django, University of Michigan (02/2024)
- Python, University of Michigan (01/2022)
